CATALYST

The CATALYST line is an evolution of the L12.2 line offering a thinner thigh rise that allows an easier overlap at the top. A stiffer Knee Stack allows the pad to be more responsive when you drop on the ice. Keeping the longer FRS to give you more support at the ankle and skate.

HZRDUUS

The HZRDUUS line is an evolution of the L20.2 line, featuring a stiffer profile for big/reactive rebounds. The flat face design provides a solid barrier, leaving minimal room for pucks to slip through. The FRS strapping options provide optimal mobility, while the composite thigh rise core allows for enhanced butterfly and RVH seal.

CATALYST

ENGINEERED FOR GREATER MOBILITY

THE CATALYST LINE IS ENGINEERED TO FACILITATE THE OVERLAP MOVEMENT AT THE TOP OF THE PAD BY INCORPORATING A THINNER THIGH RISE, ALL WHILE MAINTAINING UNCOMPROMISED RIGIDITY THROUGH THE INTEGRATION OF A CUTTING-EDGE COMPOSITE CORE.

FRS (FAST ROTATION SYSTEM)

Located on the calf, FRS includes double internal adjustable straps for increased stability and even weight distribution

1 NEW COMPOSITE THIGH RISE CORE

A 30% increase in thigh rise stiffness is paired with a more rigid knee stack, enhancing seal to the ice when dropping down and facilitating easier redirection of pucks.

2 THINNER THIGH RISE

A 40% thinner thigh rise provides ease in pad overlap when standing up or in butterfly. The pads are more reactive when dropping down and popping back up from the ice, giving greater mobility in game situations.

3 IMPROVED KNEE STACK RIGIDITY

New knee stack construction and improved rigidity provides greater stability. Combined with the stiffer thigh rise, it allows for more pressure on top of the pads in butterfly, leading to an even better seal to the ice.

NEW FOR 2025

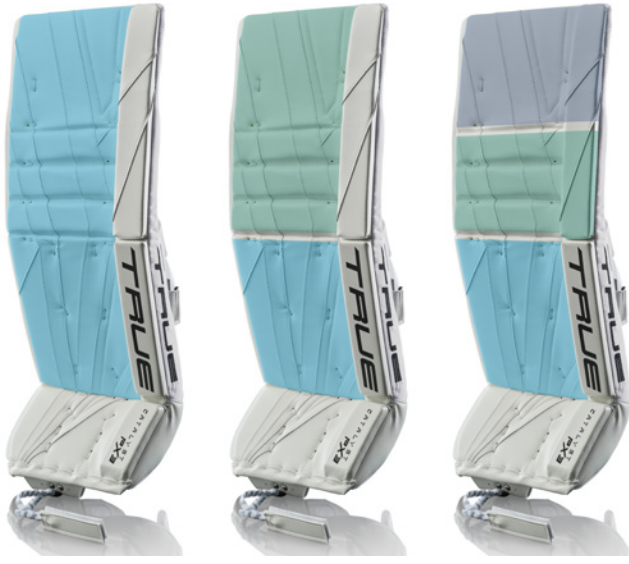

- **SMALLER CALF PROTECTOR**
- **SMOOTHER SHAPE FOR THINNER THIGH RISE**
